Panopto:

Students with recording access can now use the Panopto Capture browser-based recorder; meaning NO software to install! The desktop app is also still available, look for "Download Panopto" beneath your username at the upper right. For more details on both options, go to Panopto 101: http://bit.ly/WGUPanopto101

How do I submit my Panopto video link for task evaluation?

The student process for submitting videos should not change much. Students should upload to this folder:

- User Experience Design HJP1 | HJP2 | HJP3 | C856 (student creators) [assignments]

If student videos are uploaded to this folder, everything should work as expected. If videos are uploaded to this folder, the permissions *should not* be set to Public.

See the Task 2 Requirements in your course for more details.
